DETAILED ACTION

Status

1. Claims 1-12 and 14-28 are pending.
The objection to claim 5 is withdrawn.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

Re. claim 1, the prior art of record (Wilf et al, US Patent 5,899,980, hereafter Wilf) discloses a method for authorizing and checking out from an online purchase between a customer and a vendor site/merchant system. The second prior art of record (Paltenghe et al., PreGrant Publication 2002/0004783 A1, hereafter Paltenghe) discloses at a funds transaction server (the wallet server), receiving transaction information from the vendor site, wherein the transaction information comprises a transaction amount. The third prior art of record (Daniels et al., US Patent 5,758,126, hereafter Daniels) discloses a definition for pop-up windows as windows 'which open or "pop-up" when a display button is actuated'. The fourth prior art of record (Matyas, Jr., US Patent 6,102,287, hereafter Matyas) discloses the use of pop-up windows in order to achieve a task in a payment process. The fifth prior art of record discloses the presenting of the transfer amount through an internet interface Applicant Admitted Prior Art discloses the prior use of pop-up windows.

However, with respect to claim 1, the combined prior art of record fails to teach a proper *prima facie* case of a method and system for providing a digital IOU to the vendor; receiving a redemption request of the digital IOU; and transferring funds, in response to the redemption request, from a purchaser account to a vendor account.

With respect to claim 10, the prior art of record (Wilf et al, US Patent 5,899,980, hereafter Wilf) discloses a method for authorizing and checking out from an online

purchase between a customer and a vendor site/merchant system. The second prior art of record (Paltenghe et al., PreGrant Publication 2002/0004783 A1, hereafter Paltenghe) discloses a funds transaction server (the wallet server), receiving transaction information from the vendor site, wherein the transaction information comprises a transaction amount. The third prior art of record (Daniels et al., US Patent 5,758,126, hereafter Daniels) discloses a definition for pop-up windows as windows 'which open or "pop-up" when a display button is actuated'. The fourth prior art of record (Matyas, Jr., US Patent 6,102,287, hereafter Matyas) discloses the use of pop-up windows in order to achieve a task in a payment process. The fifth prior art of record discloses the presenting of the transfer amount through an internet interface. Applicant Admitted Prior Art discloses the prior use of pop-up windows. However, with respect to claim 10, the combined prior art of record fails to teach a proper *prima facie* case of a method and system for receiving a request for payment from the merchant system, wherein the request for payment comprises a portion that is compared with the digital signature prior to payment being made to a merchant associated with the merchant system.

With respect to claim 17, the prior art of record (Wilf et al, US Patent 5,899,980, hereafter Wilf) discloses a method for authorizing and checking out from an online purchase between a customer and a vendor site/merchant system. The second prior art of record (Paltenghe et al., PreGrant Publication 2002/0004783 A1, hereafter Paltenghe) discloses a funds transaction server (the wallet server), receiving transaction information from the vendor site, wherein the transaction information comprises a transaction amount. The third prior art of record (Daniels et al., US Patent 5,758,126, hereafter Daniels) discloses a definition for pop-up windows as windows 'which open or "pop-up" when a display button is actuated'. The fourth prior art of record (Matyas, Jr., US Patent 6,102,287, hereafter Matyas) discloses the use of pop-up windows in order to achieve a task in a payment process. The fifth prior art of record discloses the presenting of the transfer amount through an internet interface. Applicant Admitted Prior Art discloses the prior use of pop-up windows.

However, with respect to claim 17, the combined prior art of record fails to teach a proper *prima facie* case of a method and system for providing a digital IOU having a digital signature to the vendor system; creating a digital signature log of provided digital IOU's; receiving a redemption request of the digital IOU; comparing a portion of the digital IOU with the digital signature log; transferring funds to a merchant associated with the merchant system if the comparison indicates the digital IOU is authentic.

For these reasons claims 1, 10 and 17 are deemed to be allowable over the prior art of record, and claims 2-9, 11, 12, 14-16 and 18-20 are allowed by dependency.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.
